DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a memory device having split wordlines, classified in class 365, subclass 145.
 - II. Claims 15-24, drawn to a method of fabrication a memory device having split wordlines, classified in class 438, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case invention in Group I cites about a memory device having split wordlines formed over ferroelectric capacitors, whereas invention in Group II discloses about a method of fabricating a memory device claimed in invention in Group I. The memory device in Group I can be manufactured by any method in semiconductor field and not necessary by the method of fabricating the semiconductor device in Group II.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
